## Geophysical Consulting & Exploration Management

Karen Brawley-Hogg BSc (Eng), P. Geoph

President and Founder of Amulet Exploration Ltd.

<http://www.amuletexploration.com/>

Karen Brawley-Hogg has worked in Calgary for 22 years as an exploration geophysicist in the Canadian oil and gas industry after earning an Honours B. Sc. in Engineering Geophysics in 1984 from Queen's University, Kingston, Ontario.

Since 1985, Karen has acquired a wide range of experience in the Western Canadian sedimentary basin. She has worked for Canadian Natural Resources, CS Resources, Koch Exploration Canada Ltd., Petro-Canada, Remington Energy, Pursuit Resources, and Dominion Energy. She has also worked as a Vice-President of Exploration for 3 years at Quarry Oil & Gas, a publicly-traded junior oil and gas company. Following this, she participated as one of the principals and a member of the team for a private, start-up oil and gas company, Tripoint Energy. Karen is now President of her own geophysical and exploration management consulting company, Amulet Exploration Ltd.

In 1999, Karen authored and presented the paper "Use of AVO and Residual Mapping to Delineate Gething Reservoir Sands in N.E.B.C: An Integrated and Practical Approach", for which she was awarded the 1999 CSEG Convention Best Paper Award and also the 1999 Annual CSEG Best Luncheon Paper Award.

Karen has had many exploration successes in the Western Canadian Basin. A proven oil and gas finder, she is credited with finding significant reserves including new pool discoveries. Areas that have been particularly successful are in the Peace River Arch and Northeast BC plains. Karen's project experience ranges from low-risk development to the transformation of a completely undeveloped area into a producing property. And as a former executive of a small oil and gas company, Karen can assist the clients in not only the technical evaluations and play generation, but also in prospect portfolio management, ranking, and growth.
